

# When Accuracy Is Crucial, CAB SIGNAL MASTER Is The Answer

**C**ab Signal Master is all the cab signal testing you will ever need to ensure reliable speed detection. This portable, easy-to-use "railroad tough" unit provides accurate and repeatable test results for cab signal equipment in locomotives and transit cars. Count on smooth railway operation with this stand-alone tester that provides the most flexible means of cab signal testing available today.

#### Unique Features:

- Large illuminated display—easy to read in all light conditions
- Obtain real-time data including loop current while coding
- Simulates any code rate and speed at the same time
- Accurate measurements even in the presence of noise interference
- Can be configured for automatic testing
- Incorporates Duraswitch keypad technology for long-term reliability
- No other tools needed except a power source and a test loop
