

When Accuracy Is Crucial, CAB SIGNAL MASTER Is The Answer

Cab Signal Master is all the cab signal testing you will ever need to ensure reliable speed detection. This portable, easy-to-use "railroad tough" unit provides accurate and repeatable test results for cab signal equipment in locomotives and transit cars. Count on smooth railway operation with this stand-alone tester that provides the most flexible means of cab signal testing available today.

Unique Features:

- Large illuminated display—easy to read in all light conditions
- Obtain real-time data including loop current while coding
- Simulates any code rate and speed at the same time
- Accurate measurements even in the presence of noise interference
- Can be configured for automatic testing
- Incorporates Duraswitch keypad technology for long-term reliability
- No other tools needed except a power source and a test loop
